WORK EXPERIENCE

Frontend Developer

Garaje de Ideas | 04/2021 - Present

My job is to make frontend UI developments in pages that are already in production, I make aesthetic modifications, create functionalities and upload the code to Google Optimize. I make the developments with **Vanilla JS**, and I take the designs from Zeplin, right now I am leading a group of 3 developers in the hub of Argentina.

Frontend Developer and UX/UI Designer

MOBA | 2021

I participate in the development and design of a Fintech Mobile App with **React Native, Redux, Node, Express Gateway, PostgreSQL**, I organized the work schedules, the requirements to be fulfilled and their estimated time of resolution and merge to the branch master of the project using the scrum methodology.

Full Stack Javascript Developer

Henryfy | 2020-2021

I was part in the development of an E-commerce Streaming Concert Tickets Web App with **React, Redux, Node, Express, Passport, Bootstrap 4, PostgreSQL, and Sequelize** using the **scrum methodology**

SAP BW Developer

Accenture | 02/2019-09/2020

- Data flow creation, process chains, queries, end-user support, data loads, feature creation, agile approach.
- BW modeling, creation of Process Chain to execute data validation.
- Daily monitoring of data loading of BW jobs.
